

Gary J Bale

Bale Project Consulting Civil Infrastructure

Whether it is the Public Sector or Private Sector, Gary has developed a succinct knowledge of government regulations and practices, municipal engineering and public works, consulting engineering design, and design-build practices in heavy civil highway and bridge construction.

During the course of his career he has managed and operated numerous public works projects in British Columbia from the Owners perspective. Over the past years he has also been involved in municipal and provincial civil projects on the private side. He has also been involved in the pursuit of Design-Build and P3 projects in Canada and the United States with projects typically exceeding \$500M. He was instrumental in developing joint venture partnerships, bidding and managing major public and private infrastructure projects.

Gary is a member of the BC Roadbuilders Association and the Canadian Construction Association. He has been a member of CDBI since its inception and a CDBI Council member since 2007 and is currently the CDBI Vice-chair.

Gary graduated from BCIT Civil and Structural Technology program in 1974 and supplemented his education with the University of Victoria Public Sector Management program. Gary has spoken at numerous design-build conferences and programs and has constructed a number of successful design-build projects.
